General information
Move the exposed person to fresh air at once. Get medical attention if any discomfort continues.

Inhalation
Move the exposed person to fresh air at once. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Keep the affected person warm and at rest. Get prompt medical attention.

Ingestion
DO NOT INDUCE VOMITING! Rinse mouth thoroughly with water and give large amounts of milk or water to people not unconscious. Get medical attention if any discomfort continues.

Skin contact
Wash the skin immediately with soap and water. Get medical attention if any discomfort continues.

Eye contact
Make sure to remove any contact lenses from the eyes before rinsing. Promptly wash eyes with plenty of water while lifting the eye lids. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues.

8.2. Exposure controls

Protective equipment

- Engineering measures
  - Provide adequate general and local exhaust ventilation.
  - Respiratory equipment
  - No specific recommendation made, but respiratory protection must be used if the general level exceeds the recommended occupational exposure limit. Use chemical cartridge protection with appropriate cartridge.
  - Hand protection
  - Use protective gloves.
  - Eye protection
  - Wear approved chemical safety goggles where eye exposure is reasonably probable. Use approved safety goggles or face shield.
  - Other Protection
  - Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact.
  - Hygiene measures
  - DO NOT SMOKE IN WORK AREA! Wash hands at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. When using do not eat, drink or smoke.
