ROAD SALTS

PAINT PROTECTION

Our paint sealant has been professionally applied to our vehicles for many years and protects your vehicle's paintwork from the harsh environment that surrounds it – acid rain, Ultra Violet rays, atmospheric pollutants, road salt and many other causes of fading and damage, plus protection from tree sap and bird lime.

- Your car's paintwork is treated with a highly durable hydrophobic coating that bonds to the paint and forms a tough protective barrier with a high gloss finish.
- This keeps your car cleaner for longer and protects your paint from the worst that the elements can do - no need to wax or polish, all you have to do is wash the car!
- Once applied, it gives guaranteed protection for new and used cars.

To help keep your car in pristine condition, our PEUGEOT PROTECT aftercare pack includes a selection of useful aftercare products.

INTERIOR PROTECTION

Our Fabric Protection coats each fibre of the fabric with a resin based formula which won't wash out.

- This professionally applied product prevents spills of coffee, tea, milk, soft drinks, juices, water and other similar liquids from permanently staining your fabrics and carpets.
- The dirt can be either vacuumed or wiped off with a gentle cleaning solution.
- The invisible barrier helps reduce friction between the fibres, prolonging their life and allowing the fabrics and carpets to retain their natural texture and appearance.
- Once applied, it's there to stay - and that's guaranteed.

As an option for vehicles with a leather interior, PEUGEOT PROTECT's Leather Preserver formula seals and protects the surface against oil and water based staining and dye transfer from clothing, without damaging the leather's supple and lustrous feel.
