

Nissan Protect

Invisible Protection. Inside & Out.

Technology by
Supagard®

PAINT PROTECTION

All Nissan Protect products have been developed to withstand the harshest environmental and climatic conditions and our paint sealants are some of the most technologically advanced treatments available. The tough, high gloss barrier bonds to the paintwork, seals the surface against harmful UV rays, acid rain and atmospheric pollution.

PROTECTED AGAINST

BIRD LIME

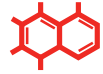

UV RAYS

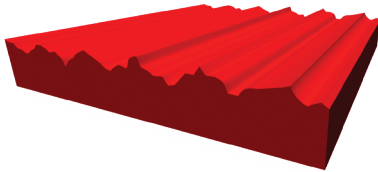

ACID RAIN

MUD & DIRT

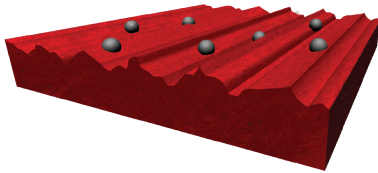

ROAD SALT

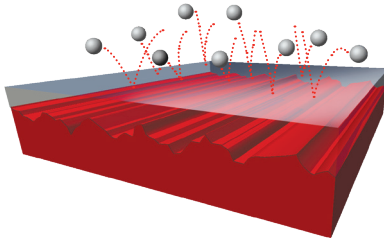

UNPROTECTED CAR PAINT

If left unprotected, deterioration begins from day one. Pollution, acid rain and UV rays will begin to oxidise the paint.

UNPROTECTED AFTER 1 YEAR

The paint has started to oxidise and the grime in the low points can only be cleaned with a cutting polish which removes a layer of paint.

PROTECTED CAR PAINT

The paint, once treated, is protected by a durable barrier. This helps maintain the high gloss shine and protects against contaminants.

FABRIC PROTECTION

Our technicians coat each fibre of the fabric seats and carpets with a resin based formula which eases the removal of dirt and spills. This prevents staining while preserving the texture and appearance of the material.

PROTECTED AGAINST

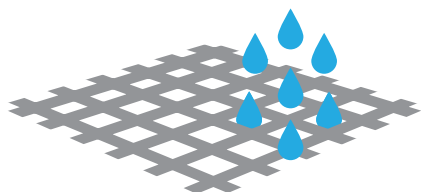

DRINK SPILLS

DIRT & GRIME

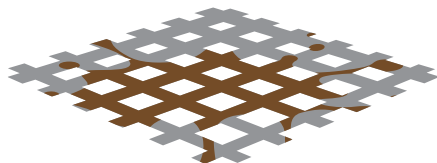

MUCKY PETS

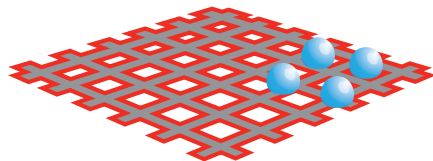

UNPROTECTED FABRIC

Liquid and dirt is free to penetrate the fibres of untreated seats.

STAINED FABRIC

These fibres have been stained by a coffee spill. Often, stains are rubbed while trying to remove them, making them worse and ingrained to the fabric.

PROTECTED FABRIC

Liquids and dirt can't penetrate the fabric once coated with Nissan Protect. Therefore it may pass between or rest above fibres but won't affect them.

LEATHER PROTECTION

(Optional Extra)

For vehicles with a leather interior, Nissan Protect's Leather Preserver formula seals and protects the surface against oil and water based staining and dye transfer from clothing, without damaging the leather's supple and lustrous feel.

PROTECTED AGAINST

DRINK SPILLS

DENIM DYE

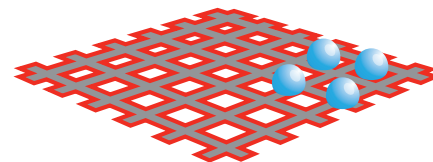

MUD & DIRT

MUCKY PETS

PROTECTED LEATHER

Liquids and dirt can't penetrate the leather once coated with Nissan Protect's Leather Protection.

SUSTAINABILITY

In the UK alone we use 14 billion plastic bottles each year. 8.3 billion are sent for recycling. That means 59% of these bottles are recycled.

41% is the total percentage of bottles sent to landfill.

To help make a difference to our planet, all of our bottles are made from 40% recycled plastics. Each of our aftercare kit bags are made from recycled plastic bottles.

OUR PLEDGE

We aim to recycle over 2 million bottles within the next 5 years.

HOW IT'S MADE.

To create our bags we have a 12 stage process. From entering the recycling centre, the plastic bottles are sorted, shredded and washed all before being melted and turned into string. The fibre string is then spun into yarn to create the polyester material that you can find on your bag. Sounds simple, right?

We feel that this manufacturing process is the way forward for helping save our planet to become as sustainable as possible for our future generations.

DID YOU KNOW?

It takes 450 years for plastic to decompose.

This has an environmental impact on at least 14 generations to come.

PEACE OF MIND

Nissan Protect professionally applied paint and interior protection products are guaranteed, subject to guarantee conditions.

AFTERCARE

After our trained technicians have professionally applied Nissan Protect to your car, we provide you with a selection of aftercare products to keep your car gleaming.

Our comprehensive Nissan Protect aftercare range has been specifically designed to give you all the car cleaning and car detailing products you'll require to keep your car in pristine condition. You can wash your car as often as required, safe in the knowledge that Nissan aftercare products are fully compatible with our paint and interior protection systems.
