

**THE ULTIMATE IN INTERIOR
& EXTERIOR PROTECTION**

THE PROFESSIONAL'S CHOICE

Our exterior and interior protection products offer real value to both new and used car customers, keeping your car looking as good as the day you bought it and ensuring that your vehicles appearance will always match its performance.

BENEFITS

Our products have been developed to withstand the harshest environmental and climatic conditions and our Ceramic Paint Sealant has some of the most technologically advanced chemistry.

Once professionally applied by trained technicians, the unique properties of our Ceramic Polysilazane protection allows it to replicate the paintwork surface. This enhances your car with a high gloss finish but also protects a matte painted car without creating a shine. It seals the surface against harmful acid rain and atmospheric pollutants. Once applied there is no need for any monthly top ups or conservers, all you have to do is wash the car. What could be simpler?

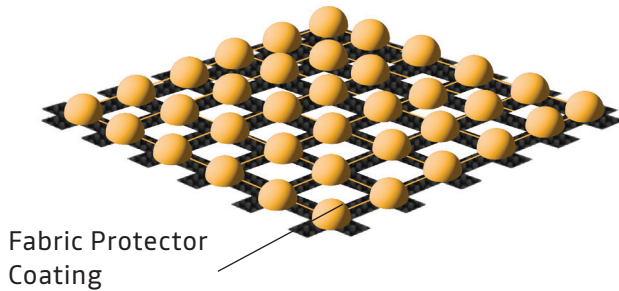

Our technicians coat the seats and carpets with Interior Renault Guard. These advanced products ease the removal of dirt and spills and prevent staining while preserving the texture and appearance of the interior. Dirt and spills can be vacuumed or wiped off with a gentle cleaning solution.

For leather interiors, we add an invisible coating across the surface which leaves a protective barrier to help prevent against dirt and spills.

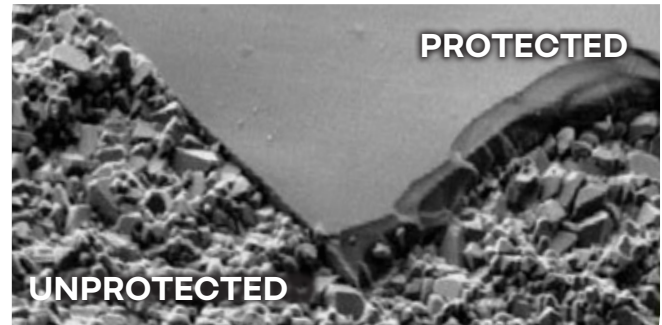

INTERIOR PROTECTION

Our Interior Protection coats the fibres of your upholstery creating a barrier which protects against liquids permanently staining your interior.

CERAMIC PAINT PROTECTION

This is Ceramic Protection under a microscope as it forms this impenetrable barrier.

CERAMIC PROTECTION

Renault Guard's advanced Ceramic Paint Sealant has been professionally applied to vehicles throughout the UK for many years and protects your vehicle's paintwork from the harsh environment that surrounds it – acid rain, Ultra Violet rays, atmospheric pollutants, road salt and many other causes of fading and damage, plus protection from tree sap and bird lime.*

- Your car's paintwork is treated with a durable ceramic hydrophobic coating that bonds to the paint and forms a tough protective barrier with a high gloss finish.
- This keeps your car cleaner for longer and protects your paint from the worst that the elements can do - all you have to do is wash the car!
- Once applied, it gives guaranteed protection for new and used cars.

This form of protection can be used on textured as well as matte paintworks. It will replicate the surface that it is chemically attached to, leaving either a glossy or matte finish.

PROTECTS AGAINST:

MUD & DIRT

ACID RAIN

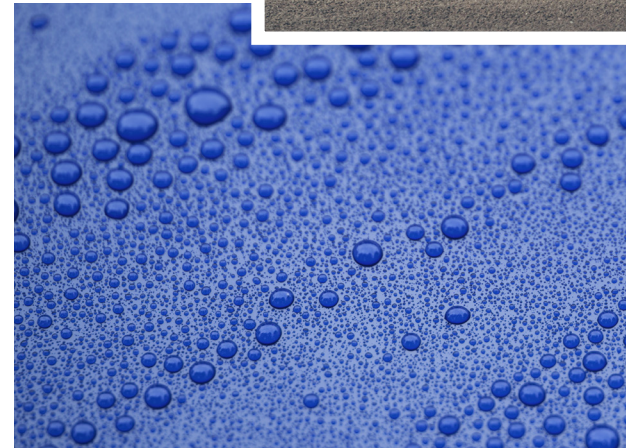

BIRD & BUG
PROTECTION

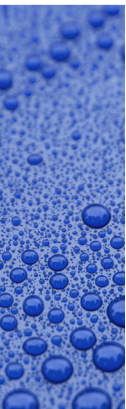

UV RAYS

ROAD SALTS

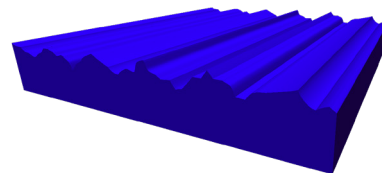

*See Terms & Conditions.

THE SCIENCE

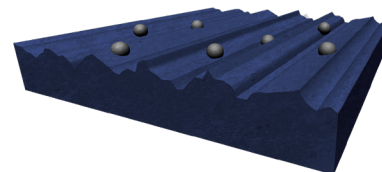

UNPROTECTED CAR PAINT

If left unprotected, deterioration begins from day one. Pollution, acid rain and UV rays will begin to oxidise the paint.

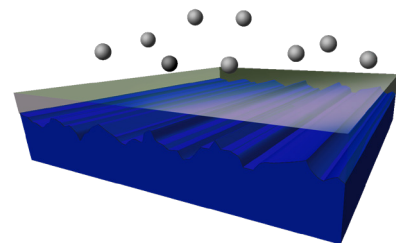

UNPROTECTED AFTER 1 YEAR

The paint has started to oxidise and the grime in the low points can only be cleaned with a cutting polish which removes a layer of paint.

PROTECTED WITH RENAULT GUARD

The paint, once treated, is protected by a durable barrier. This helps maintain the high gloss shine and protects against contaminants.

INTERIOR PROTECTION

FABRIC PROTECTION

Renault Fabric Interior Guard coats each fibre of the fabric with a resin based formula which won't wash out.

- This professionally applied product prevents spills of coffee, tea, milk, soft drinks, juices, water and other similar liquids from permanently staining your fabrics and carpets.
- The dirt can be either vacuumed or wiped off with a gentle cleaning solution.
- The invisible barrier helps reduce friction between the fibres, prolonging their life and allowing the fabrics and carpets to retain their natural texture and appearance.
- Once applied, it's there to stay - and that's guaranteed.

This invisible barrier creates a stain resistant coating that helps prevent spoiling the new look and feel of your cars seats and carpets.

Unprotected seats can lead to permanent damage by those little accidents.

PROTECTS AGAINST

DRINK SPILLS

DIRT & GRIME

MUCKY PETS

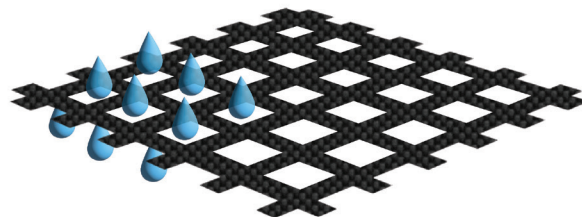

THE SCIENCE

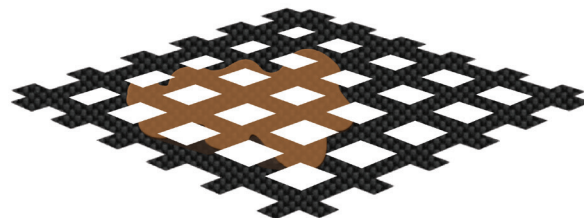

UNPROTECTED FABRIC

Liquid and dirt is free to penetrate the fibres of untreated seats.

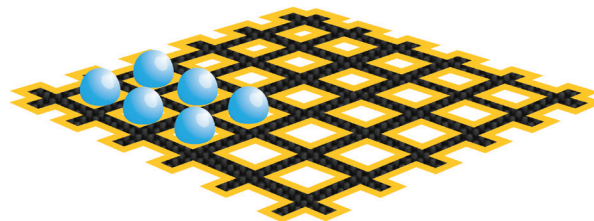

STAINED FABRIC

These fibres have been stained by a coffee spill. Often, stains are rubbed while trying to remove them, making them worse and ingrained to the fabric.

PROTECTED FABRIC

Liquids and dirt can't penetrate the fabric once coated with Renault's Fabric Interior Guard. Therefore it may pass between or rest above fibres but won't affect them.

INTERIOR PROTECTION

LEATHER PROTECTION

For vehicles with a leather interior, our Renault Leather Interior Guard formula seals and protects. Treat the surface to guard against oil and water based staining and dye transfer from clothing, without damaging the leather's supple and lustrous feel.

- Guaranteed protection for new and used cars.
- Prevents oil and water based surface soiling.
- Spills clean up quickly and easily.
- Dye transfer from denim and other clothing simply cleans off.
- Leather stays looking clean, supple and natural.

There is a variety of man-made & alcantara leather available for the interior of cars. Working closely using the same type of formula as our Fabric Protector, we have created a technology that helps to prevent cracking from ageing & weather.

PROTECTS AGAINST

DRINK SPILLS

DIRT & GRIME

DENIM DYE
TRANSFER

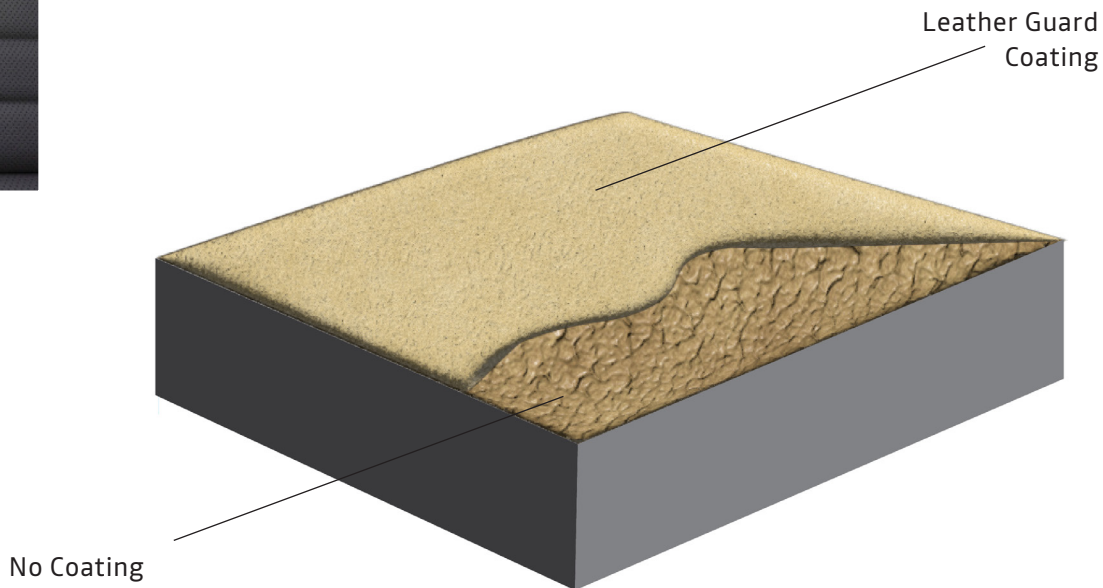

THE SCIENCE

This is Renault Leather Interior Guard under a microscope as it seals and protects the material.

Liquids and dirt can't penetrate the leather once coated with Renault's Leather Interior Guard. Therefore it may pass between or rest above the pores but won't affect them.

SUSTAINABILITY

OUR BAGS

At Renault we want to support future generations. All our customer handover bags are manufactured from recycled plastic, from 5 to 33 recycled plastic bottles.

Made From
5 Recycled Bottles.
