

Yeomans
Built on trust

The Ultimate in **Polymer & Ceramic** Technology.

THE PROFESSIONAL'S CHOICE

Our exterior and interior protection products offer real value to both new and used car customers, keeping your car looking as good as the day you bought it and ensuring that your vehicles appearance will always match its performance.

All of our products have been developed to withstand the harshest environmental and climatic conditions, and we proudly offer two advanced paint protection options to suit your needs.

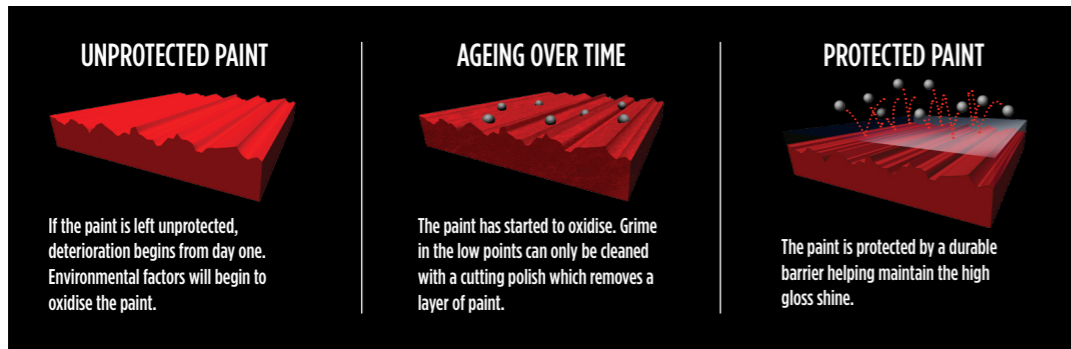

Our professionally applied products are guaranteed for the lifetime of ownership of your vehicle subject to Guarantee Conditions.

POLYMER SEALANT

Our polymer sealant has been professionally applied to vehicles throughout the UK for many years and protects your vehicle's paintwork from the harsh environment that surrounds it.

- **Highest gloss finish:** The Polymer sealant is a high gloss finish on top of the paintwork. The gloss reading is one of the highest in the industry.
- **Smooth surface:** The Polymer sealant contains unique calcium carbonates that leave the surface with a smooth finish.
- **Proven technology:** The Polymer technology comes from a proven formula that has treated millions of cars in the UK.

CERAMIC SEALANT UPGRADE

Our advanced Ceramic sealant has been professionally applied to vehicles throughout the UK for many years and protects your vehicle's paintwork from the harsh environment that surrounds it.

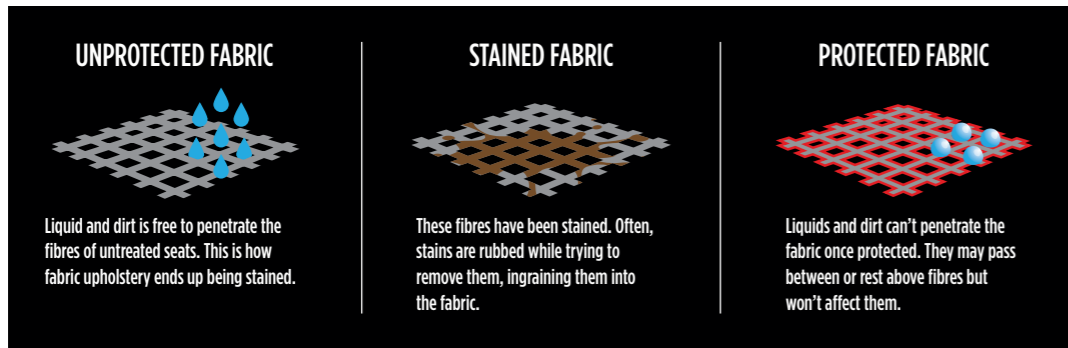

- **Exceptional Thermal Stability:** The Ceramic coating can withstand a wide range of temperatures, from very low (maintaining flexibility at -60°C) to very high (up to 300°C or more).
- **Superior UV & Weathering Resistance:** This coating is more resistant to UV radiation and oxidative degradation than the carbon-carbon (C-C) bonds in traditional waxes. This results in excellent colour and gloss retention and an extended lifespan for coatings in outdoor environments.
- **Chemical & Corrosion Resistance:** Highly resistant to a broad range of chemicals, including acids, alkalis, solvents, and fuels, which provides long-term protection against corrosion for various substrates.
- **Low Environmental Impact (in coatings):** This coating has a high-solid content and low Volatile Organic Compound (VOC) emissions, making them an environmentally friendly alternative to traditional solvent-based coatings.

FABRIC PROTECTION

Fabric Protection coats each fibre of the fabric with a resin based formula which won't wash out. These protection products are guaranteed to maintain your car's appearance and help to maintain its value when you come to sell it.

- This professionally applied product prevents spills of coffee, tea, milk, soft drinks, juices, water and other similar liquids from permanently staining your fabrics and carpets.
- The dirt can be either vacuumed or wiped off with a gentle cleaning solution.
- The invisible barrier helps reduce friction between the fibres, prolonging their life and allowing the fabrics to retain their natural texture and appearance.

LEATHER PROTECTION

Nothing complements a car more than quality leather upholstery and our new optional Leather Preserver product prevents surface soiling and makes the clean up of spills much quicker and easier. The professionally applied, cutting edge formula is designed to protect against both oil and water based stains and will help to keep your leather interior clean and protected. It spreads easily over the surface of the leather and into the pores, leaving a supple, natural feeling.

- Guaranteed protection for new and used cars – a UK first.
- Prevents oil and water based surface soiling.
- Spills clean up quickly and easily.
- Dye transfer from denim and other clothing simply cleans off.
- Leather stays looking clean, supple and natural.

AFTERCARE

Our aftercare range has been specifically designed to give you all the car cleaning and detailing products you'll require to keep your car in pristine condition. You can wash and clean your car as often as required, safe in the knowledge that Supagard aftercare products are fully compatible with our paint and interior protection systems.
