Neutron

Quantum Level Paint Protection

Welcoming the Most Advanced Surface Protection Ever Created.

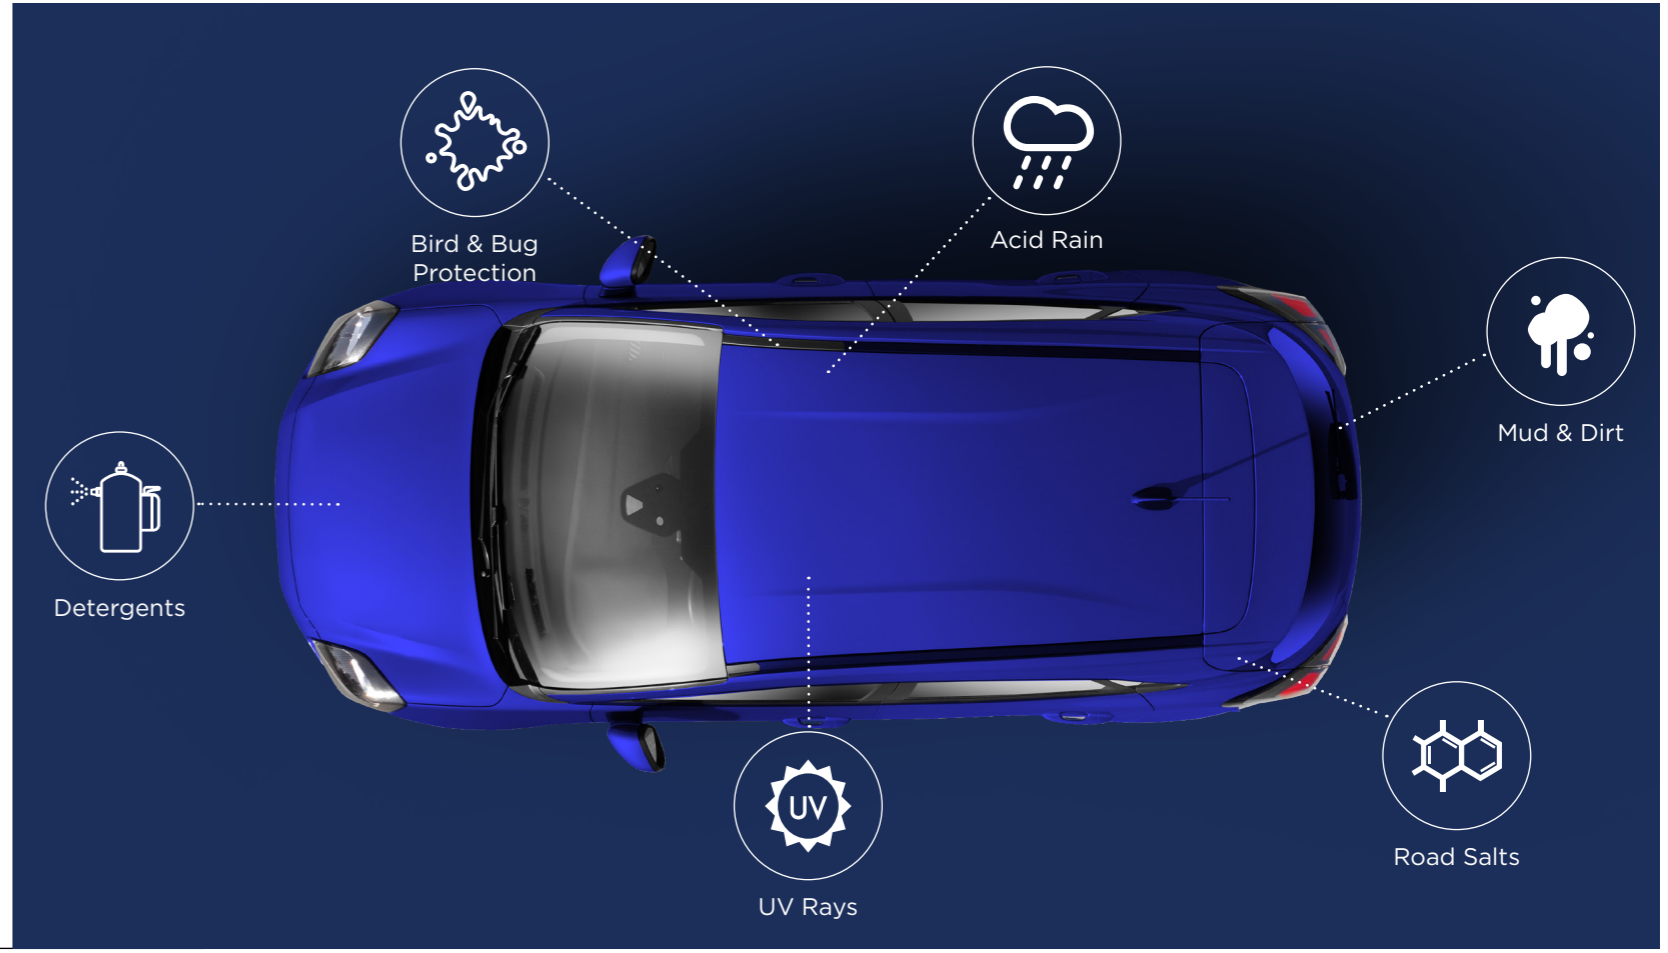

Modern vehicle paint systems are engineered for beauty but not invulnerability. Every mile exposes your vehicle to aggressive environmental contaminants that slowly degrade its finish.

These include:

- UV radiation
- Industrial pollution
- Road salt and chemicals
- Bird droppings and insect acids
- Tree sap and organic contaminants
- Abrasive washing damage

Over time these elements penetrate microscopic imperfections within the paintwork, leading to: Loss of gloss, Surface staining, Oxidation and Permanent damage.

Traditional waxes and coatings provide only temporary protection.

Meet Neutron our Quantum Level Paint Protection.

Neutron represents a new generation of advanced automotive surface protection. Developed using cutting-edge molecular engineering, Neutron forms a highly resilient protective layer that integrates with the vehicle's clear coat.

The result is a surface that becomes:

- Stronger
- More resistant to environmental damage

At the same time, Neutron dramatically enhances the visual qualities of your paintwork, producing an intense deep gloss and mirror-like finish.

The Science of Neutron.

Engineered at the Molecular Level.

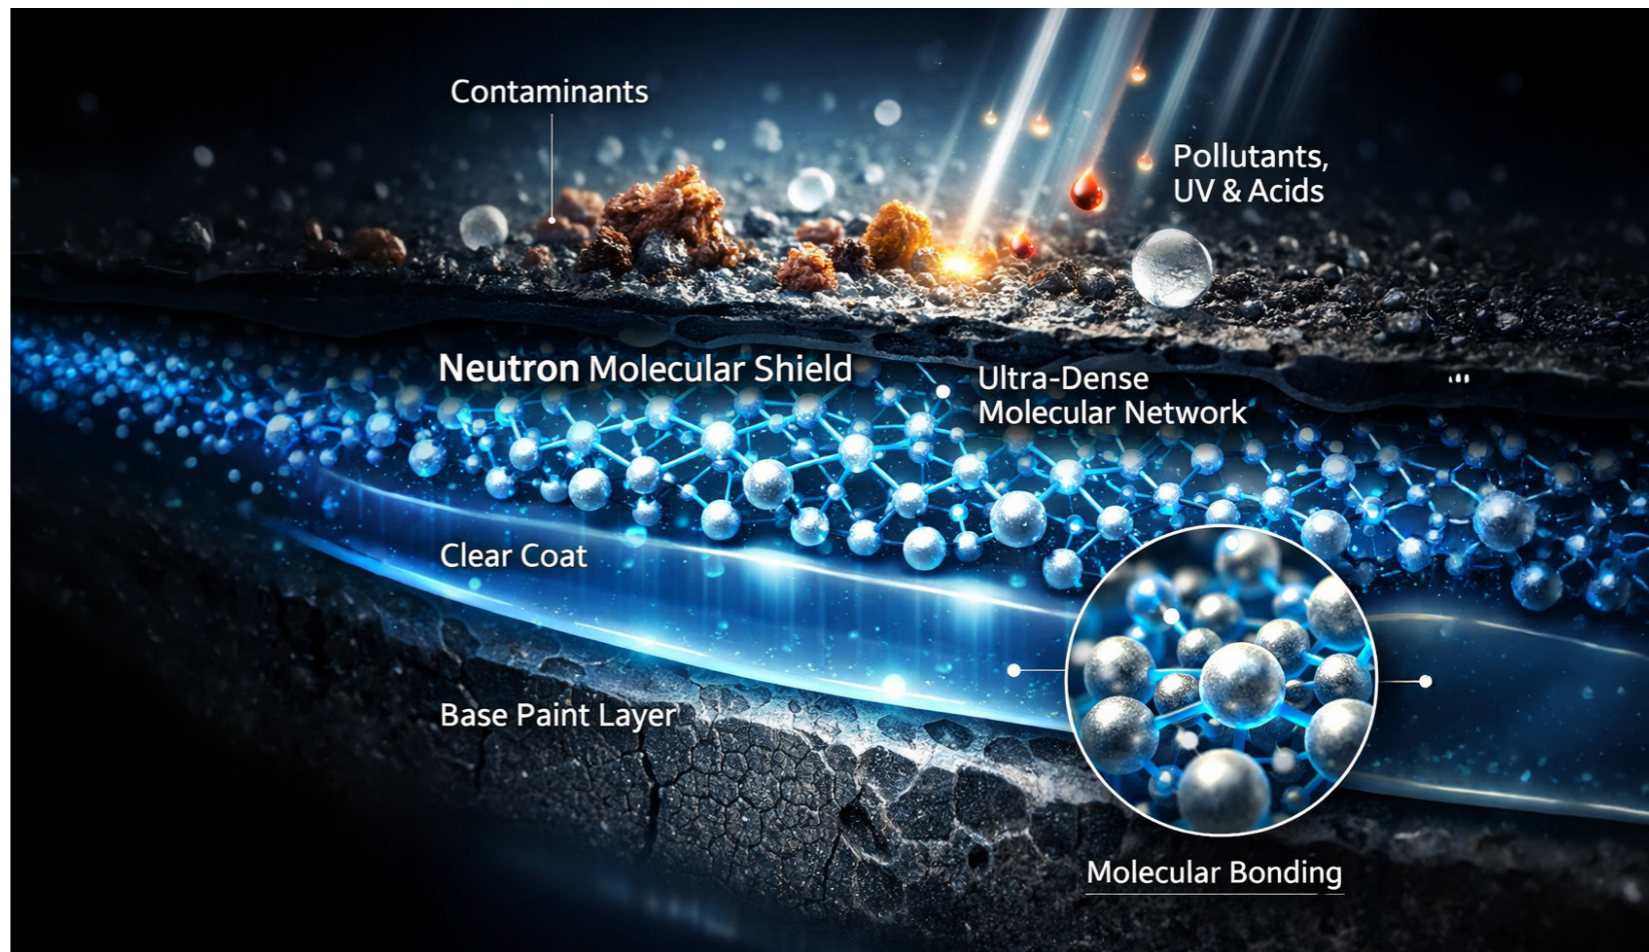

Under a microscope, automotive paint surfaces appear far from smooth. They contain microscopic pores and irregularities within the clear coat layer. Neutron technology is engineered to interact with this surface at a molecular level.

During application, the advanced formula forms a tightly cross-linked molecular structure that anchors to the paint surface. Once cured, this structure forms a dense, ultra-stable protective network.

This network delivers:

- Exceptional chemical resistance
- Enhanced surface durability
- Improved UV stability
- Increased optical clarity

The result is a highly stable protective layer designed to withstand the harshest environmental conditions.

The Neutron Effect.

See the Difference. Instantly.

Neutron transforms the surface characteristics of your vehicle's paintwork.

Its ultra protective layer dramatically reduces surface friction, preventing dirt and contaminants from easily bonding to the paint. Water beads and disperses rapidly, carrying away grime and helping maintain a cleaner vehicle between washes.

The result is a finish that stays:

- Cleaner
- Glossier
- Better protected

Fabric Protection.

Fabric Protection coats each fibre of the fabric with a resin based formula which won't wash out. These protection products are guaranteed to maintain your car's appearance and help to maintain its value when you come to sell it.

- This professionally applied product prevents spills of coffee, tea, milk, soft drinks, juices, water and other similar liquids from permanently staining your fabrics and carpets.
- The dirt can be vacuumed or wiped off with a gentle cleaning solution.
- The invisible barrier helps reduce friction between the fibres, prolonging their life and allowing the fabrics to retain their natural texture and appearance.

Leather Protection.

Nothing complements a car more than quality leather upholstery and our new optional Leather Preserver product prevents surface soiling and makes the clean up of spills much quicker and easier.

The professionally applied, cutting edge formula is designed to protect against both oil and water based stains and will help to keep your leather interior clean and protected. It spreads easily over the surface of the leather and into the pores, leaving a supple, natural feeling.

- Guaranteed protection for new and used cars - a UK first.
- Prevents oil and water based surface soiling.
- Spills clean up quickly and easily.
- Dye transfer from denim and other clothing simply cleans off.
- Leather stays looking clean, supple and natural.

After Care.

Quality Products.

The Neutron After Care range has been specifically designed to give you all the car cleaning and car detailing products you'll require to keep your car in pristine condition. You can wash and clean your car as often as required, safe in the knowledge that the products are fully compatible with our paint and interior protection systems.

Neutron customer car care products have high-quality formulations that provide long-lasting protection and shine.

Neutron
Quantum Level Paint Protection

Protection at the Quantum Level

Neutron represents the next evolution in automotive surface protection. Developed by Supagard using advanced molecular technology, it delivers a level of durability, gloss, and environmental resistance beyond conventional coatings.

Protect your vehicle's finish. Preserve its beauty. Experience the future of paint protection.
